Dear Bill

Responding to yours of
13 November 03

<<< You wrote:

I am approaching your name in my writing on contributions to medical science by scholars after age 65. Could you give me the principal titles of your writing and research labors after 1990, please, as well as your recent personal writings on behalf of sound social policies, please.

>>>

I am not sure I qualify: I've not made any really important scientific contributions since I left Stanford in 1978, at age 53. I am proud of the studies I've chaired, and the books thence edited, on issues of emerging infectious disease and defense against biowarfare. So I hope the enclosed listings will be intelligible to you.

All best wishes for this and next year, and I hope you sail through the dermatological repairs you'll be enduring next week,

Yours,

Joshua

Dear Bill

My publications from 1990 on. No research blockbusters.

These are the most important IOM study reports that I co-chaired:

242 JL, RE Shope, and SC Oaks, eds. 1992
Emerging Infections. Microbial threats to health in the United States.
National Academy Press. released 10/15/92 IOM study
posted on www.nas.edu web site

340*R* Mark S. Smolinski, Margaret A. Hamburg & Joshua Lederberg, eds.
Microbial threats to health: Emergence, Detection and Response
Institute of Medicine (IOM) 2003
<http://books.nap.edu/books/030908864X/html/245.html>

and I edited this important book:

"Biological Weapons: Limiting the Threat" MIT Press 1999
301f new edition? 2002

and

291 JL (Ed. in chief). Encyclopedia of Microbiology. 4 vols.
Academic Press San Diego 1992; 2'd Ed. 2000
